

# Space Launch System BOOKMARK

Print Two-sided

## SLS

NASA's powerful Space Launch System (SLS) will propel future explorers in the Orion spacecraft to deep space frontiers farther than we have ever gone before, and will enable science missions that deliver new knowledge and improve life on Earth.

**Stands 322 ft tall**

**Weights 5.5 million lb**

**Travels at 22,653 mph**

**JOIN US ON THE  
JOURNEY**

**@NASA\_SLS**

**#SLSInspires**
